Thank you for your inquiry.

Doing business with Express Window Films is convenient, easy and designed to save you both time and money. The information contained in the next few pages provides answers to the most frequently asked questions and will get you up and running quickly.

The following pages contain all the necessary forms which will allow you to:

- Setup your new account with Express
- Pay for your orders with a company check (if you choose to do so).
- Obtain a sample roll

We offer Free UPS Ground Freight on all electronic orders over \$500.00. Electronic orders consist of all orders placed online, fax, email or SMS. This offer is not available for call-in orders. A copy of our Fax-In Order Form is included in this information packet.

Doing Business With Our Company:

We understand that our customers do not like surprises. Accordingly, we want you to know exactly what to expect before you place your very first order with Express Films.

Our procedures are designed to allow for the swift and accurate fulfillment of customer orders and expedite the handling of customer service requests. If you have any questions after reviewing this information, please do not hesitate to let us know.

We are a very customer service oriented company. In the event that a problem ever arises in the handling of your account, our senior staff members (including the President of our company) will go to work immediately to see that you get taken care of without undue delay.

Your suggestions and ideas about how we can better serve you are always encouraged.

Thank you for your inquiry.

Express Window Films offers complementary sample rolls to qualified professional window film installers. In order to establish your eligibility, we ask that you provide us with a copy of an invoice for a recent purchase of window film (last 60 days) from any competing manufacturer.

To obtain a sample roll

- Fill Out This Form
- Submit This Form Along With a Recent Invoice (Within The Last 60 Days)
- Fax the Form and a Recent Invoice to us at: (203) 798-2253 or mail your form to:

Express Window Films 82 Mill Plain Road Danbury, CT 06811

Important Note - Please Read Carefully:

Due to the costs associated with providing these rolls, we can only make them available to qualified professional accounts. If you do not wish to provide a copy of a recent invoice to establish your eligibility, a second method is available to obtain a sample roll as follows:

You may purchase the sample roll from us for \$35.00 plus shipping. Along with your sample roll, we will send you a coupon worth \$35.00 toward the purchase of any item(s) in our catalog, within one calendar year.

Will You Be Sending An Invoice?	Yes. Send my free roll No. I will pay for the sample

Days & Hours Of Operation

Our east coast warehouse is located in Danbury, CT. Hours of operation are Monday to Friday from 9AM to 5PM Eastern Time. Our west coast warehouse is located in Placentia, CA. Hours of operation are Monday to Friday from 9AM to 4PM Pacific Time. We are closed on the weekends and all UPS Holidays.

Order Deadline is 2:00 PM

Orders placed before 2PM will ship out the same day. After 2PM, we continue processing customer orders until the minute UPS picks up. We do our best for every customer that orders after 2PM, but we can't guarantee same day shipping if the order is received after the deadline.

Placing Orders

Orders may be submitted by calling our order desk, fax, email, on-line or via SMS. We will always provide you with an order confirmation number. Please make a note of it in the event of a question later.

Electronic orders increase speed, accuracy and lower our operating costs. Hence, we provide special incentives for customers that order electronically. If you would like to get started with electronic ordering and need help getting started, please let us know. Electronic orders include all orders submitted via fax, email, on-line or SMS.

Free UPS Ground Freight – All electronic orders over \$500.00

Save on freight by consolidating your orders and ordering electronically. Electronic orders are accepted 24 hours a day, 7 days per week. If you order electronically, we will contact you to acknowledge receipt of your order. The free freight program is only available for electronic orders over \$500.00. Our order desk staff is not able to offer you this incentive for call in orders.

Order Read-backs

Our order desks are setup for direct entry. We do not write down orders and enter them later. The order is entered directly into the system while you are on the phone with the order desk staff. Once you are finished placing your order, it will be read back to you directly from the order entry screen. If the read-back is not correct, please notify the order taker at once. Our order desk staff will always ask you if the order was read back correctly and upon your acknowledgement, provide you with a confirmation number.

Payments Accepted

Your may pay for your orders via credit card, money order, company check, wire payment or PayPal. If you wish to pay by company check, you must fill out a Check Approval Application first. This form is submitted to your bank and then returned to us. In the event that your bank does not respond to our request for information, we will not be able to accept your checks.

Continued on next page >>

Credit Card Orders - Shipments to addresses other than the card billing address:

In order to participate in their merchant protection programs, credit card issuers now require us to send your order to the credit card billing address. If you request that your order be sent to an address other than your credit card billing address, it might delay the order by several days until we can get things worked out with the credit card issuer.

Your credit card issuer allows you to list additional delivery addresses to be associated with your account. In order to avoid any undue delay, please contact your credit card provider and have them add your requested delivery address to your card account file (if it differs from the billing address).

30 Day Money Back Guarantee

In addition to the applicable product warranty, Express Window Films offers a comprehensive, no questions asked 30 day money back guarantee. If any item you purchase from us does not measure up to your standards and expectations, you may return it to us for a cheerful and immediate refund, subject to the following terms and conditions:

Materials in your possession for more than 30 days are not returnable for any reason. You must return all of the material for which you are seeking credit. For example, if you return 50 percent of a roll of film, you will receive a 50 percent refund. Do not destroy or discard any film that you want to return. (The nerds in the lab want to examine it!)

If you are dissatisfied with the roll, we will also cover your return freight costs. Please send us the bill for the shipping and we will include that amount in your credit.

Swaps & Exchanges:

All orders are read back and triple checked before they are shipped. In the unlikely event that you receive the wrong item, we will offer to exchange it or take it back for credit.

The credit will be posted to your account as soon as we receive it in our warehouse. We can not issue credit until the item(s) are back in our warehouse. If you can not wait until the order is returned you will need to place (and pay for) a new order.

Be sure to maintain adequate inventory and never schedule any work until you are certain that you have the necessary items in stock to complete the job. We can not accept any liability due to lost or delayed work arising from shipment, inventory or supply problems.

If UPS shipping delays occur, we will request a service refund and credit the shipping charges back to your account. UPS will not compensate you for lost or delayed work, in the event of a problem with a shipment.

Selecting the right film and showing the customer a sample:

Avoid the expense and hassle of not meeting your customer's expectations and objectives, or even worse, damaging their windows. If you need help selecting the right film for the job, just let us know. Advice is always free. It is never a good idea to install a film without showing your customer a sample first.

Smart-Size Ordering

It's practically impossible to use 100% of the film you purchase, but depending upon your preferences and methods, we can show you how to minimize your waste and lower your costs up to 15%. Give us a call at any time to discuss how you put more of your film onto your customer's windows and less in your trash bin.

Know Your State Laws:

Know the difference between a "Net Law" and a "Film Law". If your State requires Net 35%, you can not legally install 35% film. If you need help selecting a legal film, please contact us. We have copies of the most current state laws available.

Express Window Films Definitions of Solar Engineering Parameters

SOLAR ENERGY TRANSMITTED

Solar energy transmitted is the ratio of the total solar energy passing through the glazing system to the amount of total solar energy falling on that glazing system.

SOLAR ENERGY REFLECTED

Solar energy reflected is the ratio of the amount of the total solar energy directly reflected by the glazing system to the amount of total solar energy falling on that glazing system.

SOLAR ENERGY ABSORBED

Solar energy absorbed is the ratio of the amount of total solar energy directly absorbed by the glazing system to the amount of total solar energy falling on that glazing system.

VISIBLE LIGHT TRANSMITTED (VLT)

Visible light transmitted is the ratio of visible solar energy (380 – 750nm) that passes through the glazing system to the total visible solar energy falling on the glazing system.

VISIBLE LIGHT REFLECTED (VLR)

Visible light rejected is the total percentage of visible light reflected by a glazing system that can be seen visually. GWF performance results includes Interior and exterior VLR specifications on all films. Values may be published for both the exterior and interior sides of the film. In the case of Dual Reflective films, these may be significantly different.

U-VALUE

U-value is a measure of the rate of heat conductivity of a glazing system, independent of solar radiation. When multiplied by the difference between indoor and outdoor temperature in Fahrenheit, it gives the amount of heat in BTUs/hours/square foot of glazing. Note: the greater the difference between indoor and outdoor temperatures, the greater the Uvalue, so it is important to use the Uvalues closely representing your conditions. The lower the U-value the better the insulation qualities of the glazing system.

SHADING COEFFICIENT (SC)

Shading coefficient is the ratio of the solar heat gain through a given glazing system to the solar heat gain under the same conditions for clear, unshaded double strength window glass. The lower the shading coefficient number, the better the sun control capability of the glazing system.

ULTRAVIOLET REJECTED (UVR)

Ultraviolet rejected is the ratio of ultraviolet solar energy (wavelength of 300 – 380nm) that is transmitted by a glazing system to the total solar ultraviolet energy falling on the glazing system. Note: UV energy is not visible to human eye and is mainly responsible for the degradation and fading of organic matter, upholstery, colors, etc.

EMISSIVITY (E)

Emissivity is a measure of a surface's ability to absorb or reflect far-infrared radiation. The lower the Emissivity the higher the far-infrared reflection. Infrared radiation is that which is sensed by the body as heat. The lower the Emissivity rating, the better the insulating qualities of the glazing system.

TOTAL SOLAR ENERGY REJECTED (TSER)

Total solar energy rejected is the percentage of incident solar energy rejected by a glazing system which is equal to solar reflectance plus the part of solar absorption which is re-radiated outward.

SOLAR HEAT REDUCTION (SHR)

Solar heat reduction, is the reduction in solar energy gained by a building from the sun, often by the addition of solar control window film.

GLARE REDUCTION (GR)

Glare reduction is the percentage of reduction in visible light transmission through a glazing system without film to that with film.
